

8. What systems evolved first and did they work without the other systems?

The digestive system, the appetite, the ability to find and eat food, the ability to convert the food into energy by digestion, the brain for thought, the nervous system.

9. How did intermediate transitional forms live, and why is it that we find no evidence of these creatures in the fossil records?

10. Why are there two sexes?

11. If the first generation of mating species didn't have parents, why was there a desire to mate at all, isn't evolution supposed to progress when an offspring of a mating pair has a beneficial mutation?

12. Is it possible that similarities in design between different animals prove a common Creator instead of a common ancestor?

Of course the above questions are not all of the questions that can be asked, but just a sampling of the hundreds of questions that come to mind with a little thought.

THE FOOLISHNESS OF HUMAN WISDOM

Evolution is nothing more than evolutionary humanism whereby God is removed from the equation and man replaces God. "Because that, when they knew God, they glorified him not as God, neither were thankful but became vain in their imaginations, and their foolish heart was darkened. Professing themselves to be wise, they became fools. Who changed the truth of God into a lie, and worshipped the creature more than the Creator." (Romans 1:21,22,25)

"For it is written, I will destroy the wisdom of the wise. For the wisdom of the world is foolishness with God. For it is written, He taketh the wise in their own craftiness." (I Corinthians 1:19), (I Corinthians 3:19)

THE RELIGION OF EVOLUTION

IS IT BASED
ON FAITH
OR SCIENCE?

by James Boling

CREATION OR EVOLUTION WHAT DO YOU BELIEVE?

Are the earth and all the planets just an accident? Are they the result of dust particles and gas that collided over “billions of years”? Where each collision produced a clump of matter with a larger and stronger gravitational field, eventually building the planets and solar system as we know them today. If there was nothing but gas and dust particles floating around in space where did water come from? What caused all of these clumps to orbit the sun? For that matter where did the sun come from, and how did it end up in just the right place to provide just the right amount of heat? Most evolutionists believe that the formation of our planet and the other planets along with the sun are the product of a series of unplanned accidents. The Bible tells us a different account of the formation of our planets and the galaxies in the book of Genesis. “In the beginning God created the heaven and the earth.”(Genesis 1:1)

“And the earth was without form and void; and the darkness was on the face of the deep. And the Spirit of God moved on the face of the waters. And God said let there be light: and there was light. And God saw the light, that it was good: and God divided the light from darkness. And God called the light Day, and the darkness he called Night. And the evening and the morning were the first day. And God said, let there be a firmament in the midst of the waters, and let it divide the waters from the waters. And God made the firmament, and divided the waters

which were under the firmament from the waters which were above the firmament: and it was so. And God called the firmament Heaven. And the evening and the morning were the second day. And God said, let the waters under the heaven be gathered together unto one place, and let the dry land appear; and it was so. And God called the dry land Earth; and the gathering together of the waters called he Seas: and God saw that it was good. “(Genesis 1:1-10)

“And God said, let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for seasons, and for days,

and years: and let them be for the lights in the firmament of the heaven to give light upon the earth: and it was so. And God made two great lights; the greater light to rule the day, and the lesser light to rule the night: He made the stars also. And God set them in the firmament of the heaven to give light upon the earth, And to rule over the day and over the night, and to divide the light from the darkness: and God saw that it was good.” (Genesis 1:14-18)

As you can see all of the “accidents” that evolutionists say had to happen to produce the earth and the universe are answered quite logically if you believe that the Bible is God’s word.

Evolution is believed by many to be a proven fact of science, of course this is nothing but wishful thinking. If it is a science, then it can be demonstrated, observed and repeated. Evolution cannot be proven, or even tested; it can only be believed. Many scientists say they “believe” evolution to be true, but science is based on knowledge NOT belief, therefore one can conclude that evolution is for all practical purposes a pseudo scientific religion. The basic claim of evolution is that all features of living things can be explained by unguided accidental natural processes. As a former atheist and believer in evolution who now is a follower of Jesus Christ, I now find it impossible to believe that life evolved from a single celled Amoeba living in a primordial slime. How can evolutionists ignore the fact that our bodies are marvelously designed devices? “I will praise You for I am fearfully and wonderfully made.” (Psalm 139:14)

Yet almost all text books used currently in our school systems about the human body readily attribute its marvelous design to the accidental mutations of evolution. A good analogy of this accidental design by evolution theory would be to place all of the parts to make a wrist watch in a bag and shake the bag for “billions of years”, and then when the bag is re-opened find a perfectly assembled and running watch. For me it is much easier and logical to believe all living things are the product of intelligent purposeful design by God as described in the Bible. In fact I believe it takes more faith to believe in accidental creation, as defined by evolution than it

takes to believe in the creation of life as told in the book of Genesis in the Bible.

Some scientists claim that since the DNA of Chimpanzees and humans is 98% the same that this is proof that humans evolved from Chimpanzees, but if this is true then why are chimps and humans so different from each other not only in their anatomy and physiology but also in their intelligence and behavior? Using the similarity of DNA between humans and chimps is not a biological fact that proves the validity of evolution. In fact no truly significant accomplishment of modern science either depends on evolution or supports the existence of evolution! Evolutionists casually overlook the many truths revealed in the Bible and call them “just stories”, I find it interesting that the Bible revealed that the earth was round thousands of years before man was able to ascertain this fact. (Isaiah 40-22) Evolutionists like to ignore this fact.

SOME QUESTIONS FOR EVOLUTIONISTS

1. Where did the space for the universe come from?
2. Where did all the matter come from that made the planets and the stars?
3. Do you believe that everything came from nothing?
4. Where did the energy required to organize the universe come from?
5. When, where, why and how did life come from non-living matter?
6. How did life learn to reproduce itself?
7. How did single-celled amoebas become multi-celled, and how did these cells form a fish, and then the fish to an amphibian, and amphibians into reptiles, and reptiles into birds, as the current evolutionist believes?
